DETAILED ACTION

Reasons for Allowance

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Wei-Ning Yang (Reg. No. 38, 690) on January 21, 2005.

2. The application has been amended as follows:

Replace "wherein said probe biopolymers are deposited on said dots" in step (b) of claims 1, 30, and 53 with --- wherein said probe biopolymers are dispensed on said dots ---

3. The following is an examiner's statement of reasons for allowance:

Claims 1-32 and 34-72 are allowable in light of the applicant's amendments filed on November 3, 2004 and the examiner's amendment. The closest prior art in the record are Fagan et al., (US 2003/0003484 A1, priority date: May 9, 2001), Jahn *et al.*, (Proceedings of the National Academy of Sciences, USA, 81, 1684-1687, 1984) and Shuber *et al.*, (Human Molecular Genetics, 6, 337-347, 1997). These prior art do not teach that said probe biopolymers are dispensed on said dots in said microarray as recited in step b) of claims 1, 30, and 53. These prior art either alone or in combination with the other art in the record do not teach or reasonably suggest a method for detecting a target biopolymer as recited in claim 1, a method for detecting a target nucleic acid in a sample as recited in claim 30, and a method for detecting one or more target analytes in a sample as recited in claim 53.
